WE ARE pleased to pass this on to you because it is an example of what we are constantly hearing about our representatives. all of whom are carefully selected and welltrained to give courteous advice and service to those who are already policyholders and those who contemplate insuring in Canada's original mutual life insurance company.

(Over 46% of the new business written by the Company during the current year was on the lives of those who were already policyholders.)

Do not hesitate to ask the Mutual Life of Canada representative in your community for an interview. His friendly service is yours for the asking. If you prefer mail the coupon below to our Head Office and we shall be pleased to forward it to your nearest representative.

INCIDANCE

# TO ALL MERCHANTS MANUFACTURERS AND BANKERS....

# This is the way to BETTER BUSINESS

"Before there is any great upturn in volume of sales for manufacturers of trade-marked merchandise, there must inevitably be a great upturn in advertising volume.

"Because, merchandising embraces every marketing process involved in getting a commodity from the factory to the consumer. Not merely from the factory to the salesman. Not from the salesman to the wholesaler. Nor from the wholesaler to the retailer. But all the way from the factory to the consumer. Including all the in-between stopping-places.

"Merchandising is complete trade. Goods fully sold. Commodities taken to their cash-yielding terminal. When this last step rounds out the procedure... when the ultimate user's cash flows back through the channels of trade... and the way is opened for repeat sales... then we have Business."\*

HERE WE HAVE THE ECONOMIC BASIS OF ADVERTISING

For if we agree that merchandising requires this completion of selling, so that goods go into use and are used up, then we establish the place of advertising as a business essential. Advertising holds its position because it simplifies dealing with the public—as to effort, time and cost. It is an intrinsic part of selling at that last step which actually moves the goods into consumers' hands.

Advertising in the Daily Newspapers—if it is geared by intelligent and trained men to do its necessary share in the job of selling—is an unchanging dominant power—the most rapid, direct, simple and economic contact with Canadian consumers.

It's simple. First, of course, comes the planning of a simple, flexible budget. Then take this copy of this paper and rezince budget. Inen take this copy of this paper and look carefully through the ads to find the items that you need at the prices that fit your budget. Fill your wants every day by reading the advertisements in this paper to balance your budget before you go out to buy instead of buying the things you want and then seeing if your budget balances . . . this is organized buying and will give you more things for less money; less effort.

GLADNESS WILL COME By Aline Michaelis

Oh, the world is wide and the world is fair,
And with many a land to see!
Why dwell in a shuttered house of care
With the past for company?

God has fashioned the Earth to blossor

anew With fresh promise for every dawn. Then why should the wistful gaze purs The light of the years that are gone?

For the sun still shines and the sea still

sings
And the white roads wind away.
Why hark to the foolish heart that clings
To a love that would not stay?

Be strong, be brave, for the world is wide And the wisest are those who forget. Let the past go out with the ebbing tide, And gladness will come to you yet!

AN AVERAGE OF 50,000 PEOPLE saw each of the four world series baseball games, and they paid an average of three dollars each for the privilege. All of which goes to show that professional baseball in the United States is a mighty business well organized, with an exceptionally clever publicity department, including Babe Ruth, mighty home run specialist, who gets a salary greater than the Presi-dent of the United States, with an under-study in Lou Gehrig, who bangs them out espirit.

MR: PICOBAC set with his feet on the versadah railing, filling his pipe from a freshly opened tin of Picobac.

"Once upon a time," be began again, "folks were so plum ignorant, they didn't know we could grow burley tobacco down here on Lake Erie . . and as good a burley as in any place in the world."

The buttons of Mr. Picobac's vest rose and fell in sympathy with the vibration of silent laughter underneath.

"But they know better now," said he, "They're learning every day, Civilization is spreading far and wide."
He placed his pipe in his teeth and closed the lid
of his Picobac tin.
"That's what's doing it," declared he. "Picobac!"

# Can You Control \$1 a day for your own future?

IF so, here is what one of our new Monthly Investor's Bonds will do for you:

1. For a deposit of \$25 each month, you can build a surprisingly large guaranteed cash estate for retirement at age 60 or 65.

A man aged 33, for instance, would have a guaranteed sum of \$10,139 when he reached 65.

2. To this would be added a very substantial amount in the form of annual dividends—substantial because of the Company's consistently high earning power.

If these dividends were accumulated they would be sufficient to meet the last 9 years' deposits. Furthermore, the bond would be earning dividends during those 9 years.

(References made to dividends are on the present Lundon Life scale and are not so be taken as an oximate.)

3. In a London Life Monthly Investor's Bond you possess a guaranteed investment with all the security of this Company back of it. It is not subject to market fluctuations or general business slumps.

4. This bond is insured. If you do not live until it matures, the full amount will be paid immediately to the person designated.

The man who is saving to "get somewhere" will find in this new bond the ideal investment, combining asfety with all the sdavantages of insurance, and paid for by small monthly amounts. Such in the service offered exclusively by this Company.

### "I Feel That The Bank of Montreal Has A Distinct Personality"

Said an old customer of the Bank recently: "In my opinion a bank has a personality just as positive and dis-tinct as that of an individual."

The personality of the Bank of Montreal, crested by its founders and perperusted by their successors, is reflected in the substantial character of the clientele the Bank has drawn to it, and expresses itself through more than 600 Branches,

which are so many points of con-tact with the people and the com-mercial life of Canada.

The elements which have gone into that intangible but very real thing —the personality of Canada's oldest bank—include the Bank's unwaverpank—include the Bank's unwave ing strength and conservatism, it helpful, efficient service, and it thorough knowledge of local cos-ditions whetever it is recover-

### McNABB'S

# Isn't it about time you had some GOOD clothes?

T was fun for a while, but honestly now, aren't you sick to death of cheap clothes? Aren't you longing to go out and spend some real money - on something good? Once you've known the feel of frocks that really fit you. once you've cared whether hems were rolled by hand or sewn by machine, once you've worn and loved beautiful fabrics - can you ever really give them up? These things are in the blood - generations of training have

taught you to prize them - can they be so lightly cast aside? Of course not. Of course not.

So McNabb's say "Obey that impulse. Go on a Quality spree!" Spend more than you have in months. and less than you will ever again in your lifetime (in all probability) on the GOOD THINGS you crave. McNabb's know you want them, and McNabb's HAVE them.

It's simple. First, of course, comes the planning of a simple, flexible budget. Then take this copy of this paper and look carefully through the ads to find the items that yended at the prices that fit your budget. Fill your wants every day by reading the advertisements in this paper, but he was a substance your budget before you go out to buy instead of buying the things you want and then seeing if your budget belances ... this is organised buying and will give you more things for less money; less effort.

## WE RECOMMEND THESE PURCHASES

In this issue you will find a number of advertisements of real interest

They offer for sale a variety of products that are often enough vital necessities, sooner or later you will have to buy many of them anyway. You will undoubtedly buy some of those we advertise.

nend these heartily because we know from long experience that when a product bears the name of its maker and finds a friendly market throughout the country it must have survived the most exacting tests as to quality, desirability, and VALUE!

In this day when a manufacturer or merchant reaches the point where he is willing to offer his wares for sale through the advertising columns of the press, you can depend upon it that it must be worth purchasing . . . because otherwise the business wouldn't last long!

# LATENT GIFT

OH MY POOR PERTI"—When you say that you reed CRESS CORN SALVE to remove those Corns, Callouses, Ingrown Toe-Nails—Your favourite druggist is ready to supply you.

50 YEARS AGO OCTOBER 25, 1882.

"It's no trouble . . . . I have a Telephone in the kitchen"

When you are busy in the kitchen and friends telephone, or you have an order to give the grocer, it is always trouble-

some to have to go to a telephone in an other part of the house.

The modern housewife has a telephone in the kitchen where she can use it quickly and conveniently, save time and extra ateps, and prevent spoiled cooking and endless annoyance.

You can have an extension telephone in your kitchen for only a few cents a day. Any Bell Telephone employee will be glad to give you particulars and see that your order is promptly carried out.

### **DOMINION OF CANADA BONDS** 1932

On Monday, October 31, Canadians will have an opportunity to invest in a new issue of \$80,000,000 Dominion of Canada Bonds. By buying these Bonds you will accomplish two things:

- 1. You will obtain the soundest investment available to Canadians, secured by the resources and integrity of the Dominion.
- 2. You will assist in further strengthening Canada's financial position, with favourable effect upon general business.

NOTWITHSTANDING the trying conditions . which have prevailed during the past three years, Canada has established an enviable record of financing. For example, among other accomplishments, the Dominion has refinanced-before maturity and at a reduced interest rate-\$640,000,000 of its public obligations, due in 1931, 1932, 1933 and 1934.

The new Dominion of Canada Bonds, which will bear 4% coupons, will be offered at a sufficient discount to provide an income yield in / line with current interest rates. Within the last few months Great Britain and other countries have arranged important financial operations. In each case, these have met with marked success, investors having quickly recognized the trend toward lower interest rates

The success of the new Canadian loan is important. It will further demonstrate the confidence of Canadians in their own country and this confidence will be reflected in the money markets of the world.

For national advantage—and for your individual benefit—plan now to buy Dominion of Canada 4% Bonds, 1932, when they are offered next Monday

This preliminary advertisement is published by THE DEPARTMENT OF FINANCE to enable Canadian investors to make arrangements to participate in this offering.

After twenty years we find Time has not been wholly kind. Eyes once innocent and gay Now have lost youth's lucent ray And the heart which knew no fear Learns fresh caution every year.

After twenty years we gain Something of the use of pain; Rebels still, but yet we see Life must be a mystery. Not for us to lift the veil, Learning why we win or fail.

We can in the end devise

"SMART AS YOUR NEXT HAT As surely as an original Paris har forecasts the fashion trend of the feminine world, so Pontiac sets the style standard for motor cars. And when Miss Frances Thompson, director of the Canadian School of Home Science, says that "Pontiac is as smart as your next hat," she speaks from experience. For she is driving a Pontiac during her School here and is as proud of its modish lines as she is of its smart performance.

# The Upward Trend of Public Confidence

ONEY rates are a barometer of conditions. Lower inter-Money rates are a parometer of the prices indicate est rates and consequent rising bond prices indicate confidence. This upward trend of confidence has been evident in the important financial centres of the world.

Investors have recognized the encouraging world-wide tendency toward lower interest rates by subscribing heavily to recent public issues. There is cause for satisfaction in the fact that bonds of the Dominion of Canada are sharing in the improvement that is taking place.

### Plan Now to Buy the New Dominion of Canada Bonds

On Monday, October 31st, there will be offered to the Canadian public an issue of \$80,000,000 Dominion of Canada 4% Bonds, 1932. They will be offered at a discount which will provide an income yield in line with present interest rates. This issue will offer Canadians an opportunity to obtain the soundest investment for their savings and, at the same time, to render an important national service.

As an investor and as a citizen-for your individual benefit and for national advantage-plan now to buy the new Dominion of Canada Bonds when they are offered on Monday.

This preliminary advertisemens is published by THE DEPARTMENT OF FINANCE to enable Canadian investors to make arrangements to participate in this offering.

## The HAPPY ENDING ... By Jimmy

It's simple. First, of course, comes the planning of a simple, flexible budget. Then take this copy of this paper and look carefully through the ads to find the items that you need at the prices that fit your budget. Fill your wants every day by reading the advertisements in this paper to balance your budget before you go out to buy instead of buying the things you want and then seeing if your budget balances . . . this is organized buying and will give you nore things for less money; less effort.
